Digital Confidence Releases ConfidentSend 2.0 and BatchPurifier 2.0

TEL AVIV, ISRAEL (March 16, 2009) — Digital Confidence, the leading provider of data leakage prevention (DLP), hidden data / metadata removal, and privacy software solutions, today announced the release of version 2.0 of its hidden data / metadata removal software products: ConfidentSend™, which seamlessly integrates with Microsoft Outlook® 2003/2007 or with Mozilla Thunderbird™ email clients, inspects and cleans the attachments of each and every outgoing email; and BatchPurifier™ which can remove hidden data from multiple files.

The new versions features improved user interface, and were added the ability to remove hidden data from PDF documents, AVI video files, and WAV audio files. ConfidentSend™ has also been added with automatic hidden data removal capability and a whitelist feature to let the user specify recipients for which email attachments should not be cleaned.

ConfidentSend™ and BatchPurifier™ are the most comprehensive hidden data removal solutions on the market today, capable of removing 33 types of hidden data from 14 file types, including Microsoft Office® documents, OpenOffice.org / StarOffice™ documents, PDF documents, and popular image and media file types such as JPEG, PNG, AVI, and WAV. Both products are able to remove hidden data from files even if they are compressed within ZIP files.

ConfidentSend™ and BatchPurifier™ fits businesses, legal professionals, defense and military organizations, webmasters, and privacy conscious persons, and enables them to share files without the worry of unintentional sensitive data leakage through the hidden data embedded within them.
