Digital Confidence Adds F4V and BWF Support to BatchPurifier

TEL AVIV, ISRAEL (May 2, 2010) — Digital Confidence, the leading provider of data leakage prevention (DLP), hidden data / metadata removal, and privacy software solutions, today announced addition of F4V and BWF support to its batch metadata remover - BatchPurifier™.

The new version of BatchPurifier™ is able to remove XMP and other metadata types from F4V files, and to remove metadata from Broadcast Wave Format (BWF) files.

BatchPurifier™ is the ideal tool to remove hidden data & metadata from multiple files. Powered by Digital Confidence DataDistiller™ Engine, BatchPurifier™ is able to remove more than 40 types of hidden data from 19 file types, including Microsoft Office® documents (Word, Excel, PowerPoint), OpenOffice.org / StarOffice™ documents, PDF documents, and popular image and media file types such as JPEG, JPEG 2000, PNG, SVG, AVI, WAV, MP3, MP4, and F4V. BatchPurifier™ is able to remove hidden data from files even if they are compressed within ZIP files.

About Digital Confidence

Digital Confidence is the leading provider of data leakage prevention (DLP), hidden data / metadata removal, and privacy software solutions to individuals and organizations of all sizes, from small and medium businesses and law firms, to large-scale enterprises.

Digital Confidence's best-of-breed products enables its customers to make their way in the digital world with confidence, and frees them from the worry of unintentional sensitive data leakage which can cause embarrassment with possible financial and legal implications.

Digital Confidence is a privately held company with corporate headquarters in Tel Aviv, Israel.
